

Service for the future

Vogelsang „Windkraftservice“

We know what we're talking about

Vogelsang customers know what they want. They are people with responsibility who are used to solving problems. People who expect precise planning and effective action combined with cost-effectiveness and reliability. And because we think the same way we can do a lot for you.

For decades we have specialised in the maintenance, inspection and repair of all main components in your wind power plant. For many years we have been a valued partner of the wind energy sector. Please visit our homepage for actual references.

Quality, knowledge and mechanical skill are only a part of the story when it comes to maintenance as it is required today - just the prerequisite for modern plant management.

Vogelsang - customers expect more:

Rapid and individual analysis of the task, accurate assessment of the situation and reliable implementation of the solution.

And this applies to everything we do, routine revision, complex assessment of the condition of machinery or complex assembly and disassembly work. We speak our customers' language and solve the problems together.

Teamwork is what wins.

With Vogelsang Windkraft you benefit from decades of experience in the maintenance, inspection and repair of

- **Generators**
General inspection on site
